Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Storypoints)

Date	2 November 2022
Team ID	PNT2022TMID37526
Project Name	Car Resale Value Prediction
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	Story Points	Priority			
Sprint-1	Pre-process data	Collect Dataset	1	Low		
Sprint-1		USN-2	Import required libraries	1	Low	
Sprint-1		USN-3	Read and clean data sets	2	Low	
Sprint-2	Model building	USN-1	Split data into independent and dependent variables	3	Medium	
Sprint-2		USN-2	Apply using regression model	3	Medium	
Sprint-3	Application building	USN-1	Build python flask application and HTML page	5	High	
Sprint-3		USN-2	Execute and test	5	High	
Sprint-4	Training the model	USN-1	Train machine learning model	5	High	
Sprint-4		USN-2	Integrate flask	5	High	

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)				
Sprint-1	20	6 Days	02 Nov 2022	05 Nov 2022	20	10 Nov 2022				
Sprint-2	20	6 Days	04 Nov 2022	05 Nov 2022	20	12 Nov 2022				
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	20	14 Nov 2022				
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	20	19 Nov 2022				

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{sprint\ duration}{velocity} = \frac{20}{10} = 2$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

• CAR-1 Data set collection about second hand cars																					
CAR-2 import required libraries																					
CAR-3 read dataset																					
CAR-4 clean dataset																					
CAR-5 split data into independent and dependent v																					
CAR-6 Apply using regression model																					
CAR-7 Build python flask application																					
CAR-8 Build HTML page																					
CAR-9 Execute and Test																					
CAR-10 Train Machine Learning model																					
CAR-11 Integrate flask
